Sales Pipeline Performance Review

Key insights, gaps and recommendations to lift win rate

663 opportunities | $1.90B pipeline value | 2024 opportunity data

Pipeline is growing, but conversion is not

663

opportunities worth $1.90B; average deal about $2.9M

26.4%

win rate: 116 won vs 323 lost (0.36 won/lost ratio)

+48%

Q4 opportunity growth QoQ, value +52%; May +133%, June -64%

47% vs 15%

win rate: Digital QA vs Consultation & Advisory

Growth is volume-driven (deal size is stable), yet only about one in four decided deals is won.

Win rate = Won / (Won + Lost). Opportunities counted once per ID; quarters by Opportunity Date.

Where the pipeline is leaking

$527M

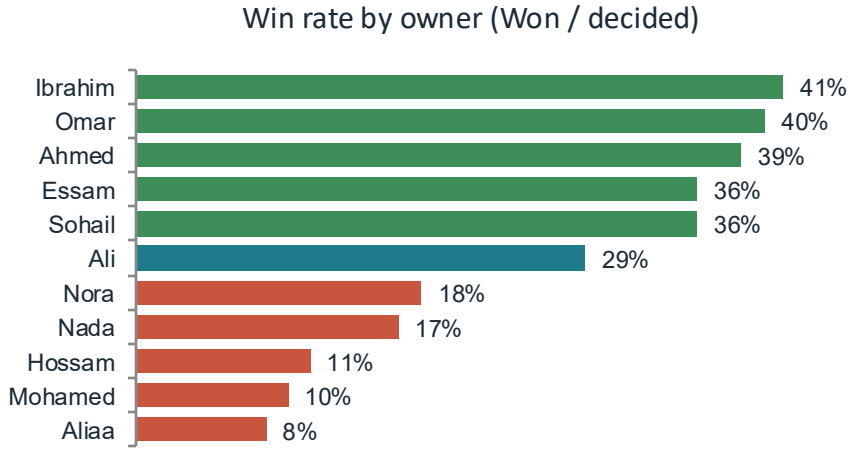

175 deals on Hold or Unspecified: 4.3x the $123M live pipeline

23 deals

live opportunities ($51M) already past their expected close date

11.5% vs 36.2%

win rate: five owners holding 40% of pipeline vs the other six

Other missed opportunities

- **Consultation & Advisory:** $279M of demand, 14.7%-win rate
- **Application Security and Cloud:** about 15%-win rate
- **29 of 66 customers with 3+ opportunities** have never been won (tawal: 0 of 9 decided)
- **Cybersecurity Services BU:** 0 of 10 decided deals won

Snapshot assumed on 31 Dec 2024 (last opportunity date). Owner and BU samples are small, so read as indicative.

Recommendations to lift win rate and targeting

1 Clear the undecided 34%

Force Won, Lost or a dated next step on the 175 Hold and Unspecified deals. Re-date the 23 overdue ones. Make Stage mandatory in the CRM.

Target: forecast reflects the real pipeline

2 Close the owner gap

Pair the five owners at about 11% with the 36-41% performers in weekly deal reviews. Share Sohail's playbook (28% of opportunities, 40% of won value).

Target: reach the 26% average = ~26 more wins, ~$72M (illustrative)

3 Focus on services that convert

Lead with Digital QA (47%) and TMMI (50%, small sample). Qualify harder or rework Consultation, Application Security and Cloud (about 15%).

Target: shift pipeline mix to high-win services

4 Target and expand accounts

Grow existing customers: repeat customers win 30.7% vs 15.4%. Add a go/no-go review after 3 losses with no win.

Target: second opportunity for the 57% of customers with only one

Impact estimate is illustrative: 174 decided deals at 26.4% instead of 11.5%, at the average won deal of $2.8M. Not a forecast.

Thank you
