# Screens leak reach, yet most campaigns still lift sales

**46%**

of screens see less than the store's foot traffic

**67%**

of screens play more ads than the viewers they reach

**69%**

of campaigns grew daily sales vs the prior 6 months

**Fix the screens first — then every campaign reaches more of the crowd.**

# Two checks: is the screen seen, and does the campaign sell?

**Store door camera**
counts every shopper

**Screen camera**
counts shoppers facing the screen

**Plays**
times an ad ran

SETUP QUALITY · 100% OR MORE IS HEALTHY

**Traffic %**
screen viewers ÷ door count

**Awareness %**
screen viewers ÷ plays

CAMPAIGN PERFORMANCE

**Sales uplift**
daily sales in campaign ÷ prior 6 months

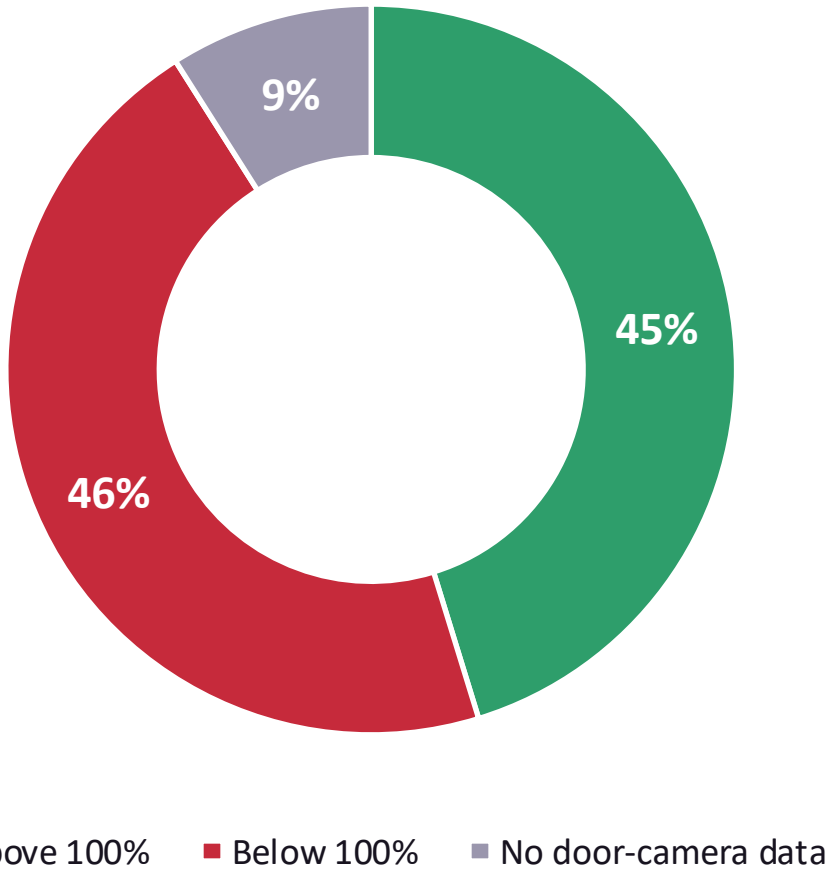

NOT REPORTED

**ROAS**
sales uplift ÷ budget

NOT REPORTED

**Creative quality**
score against criteria

# Only 45% of screens see the full store traffic

**361 screens below 100%**
They see fewer people than walk in. Check position and angle.

**71 screens unmeasured**
No door-camera baseline to compare against.

**Readings up to 388%**
More than the door count is not always good. Verify the counting.

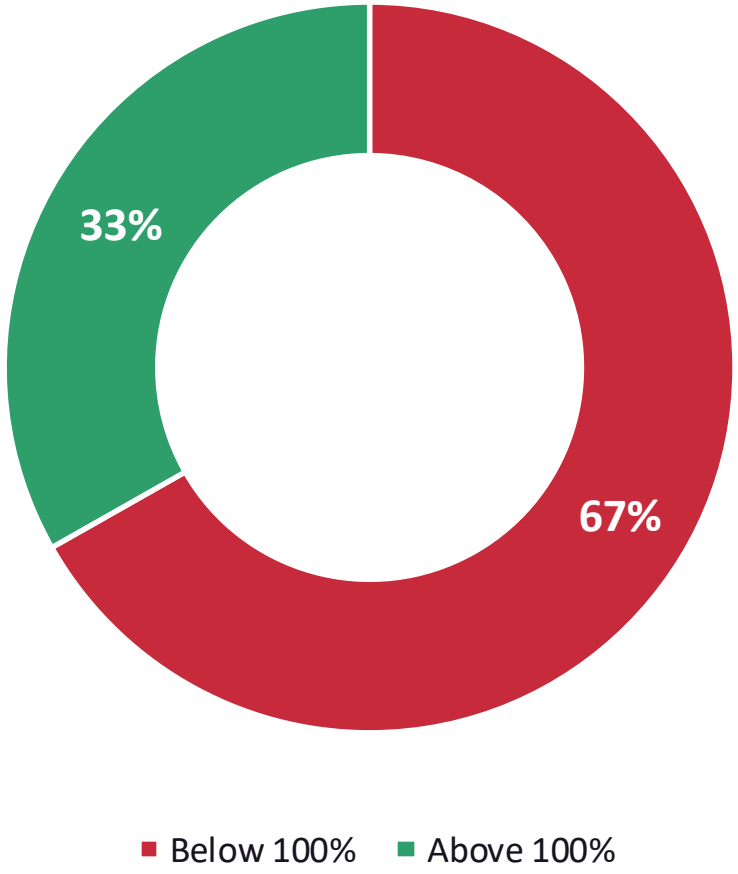

# 2 in 3 screens play more ads than they have viewers

**67%**

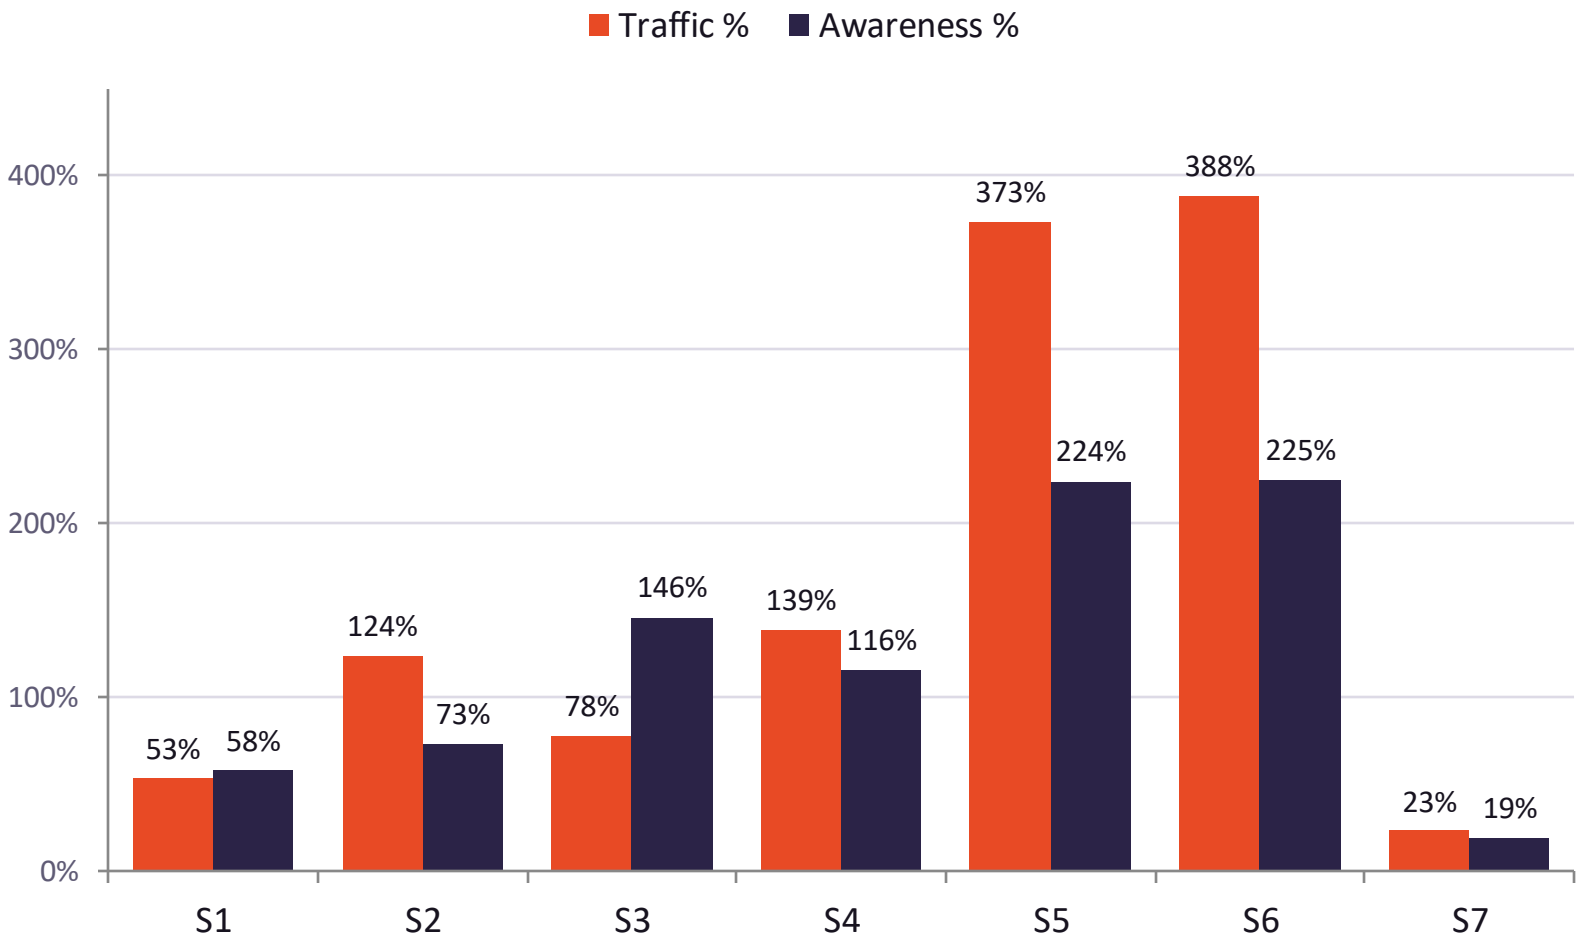

of screens: 527 of 789 — plays outnumber viewers (wasted plays)

**33%**

of screens: 262 of 789 — viewers keep pace with plays

# Same store, seven screens: 23% to 388% of traffic

## S7

**23% traffic · 19% awareness**

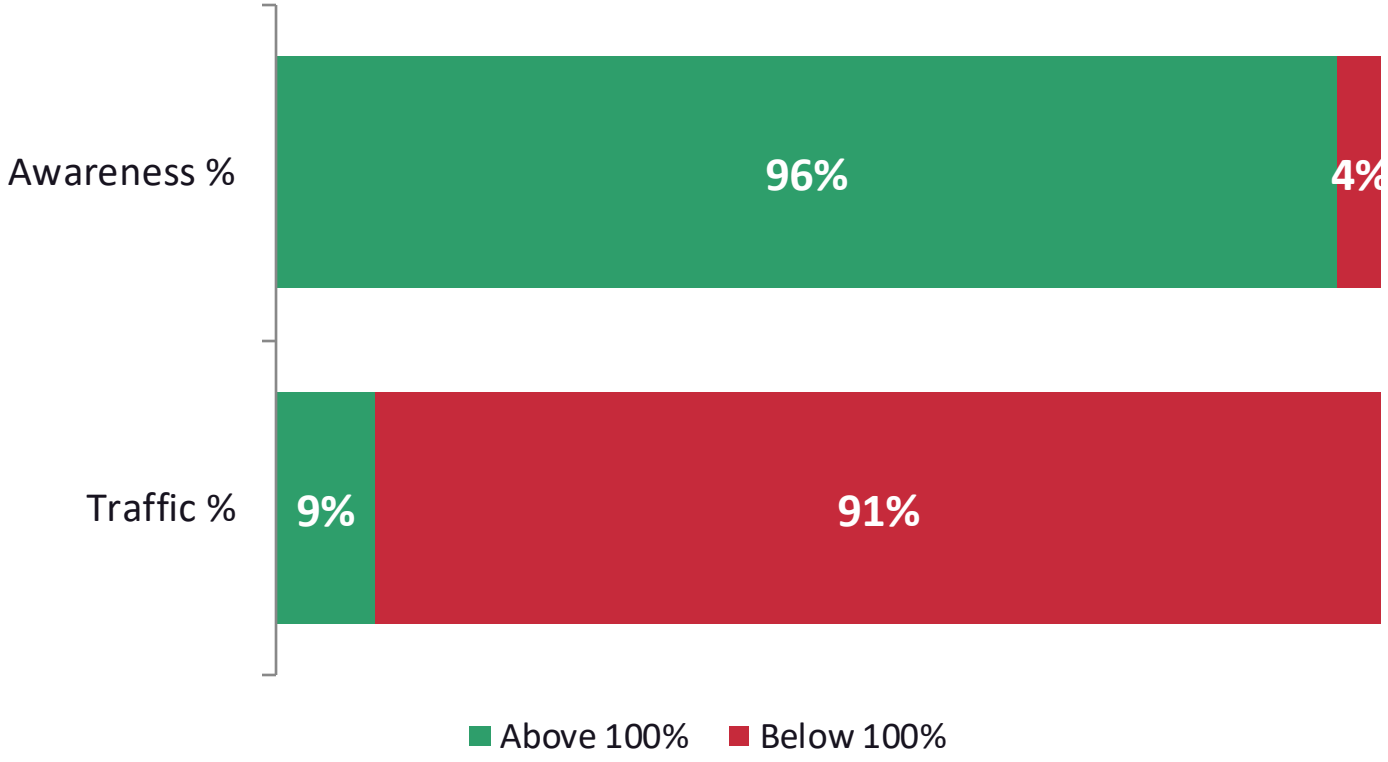

Sees almost no one. Inspect first.

## S5–S6

**373–388% traffic**

Far above the door count. Verify the baseline.

# LG Fridges: well-paced ads, but screens miss the crowd

**96% keep pace with plays**
Ads are not being wasted.

**91% see less than the door count**
The issue is where screens face, not how often ads run.

336 screens running the LG Fridges creative

# Worst offenders: some screens see almost no one

**12 of 15**

reviewed screens capture under 5% of store traffic

**2**

screens have no viewer data at all

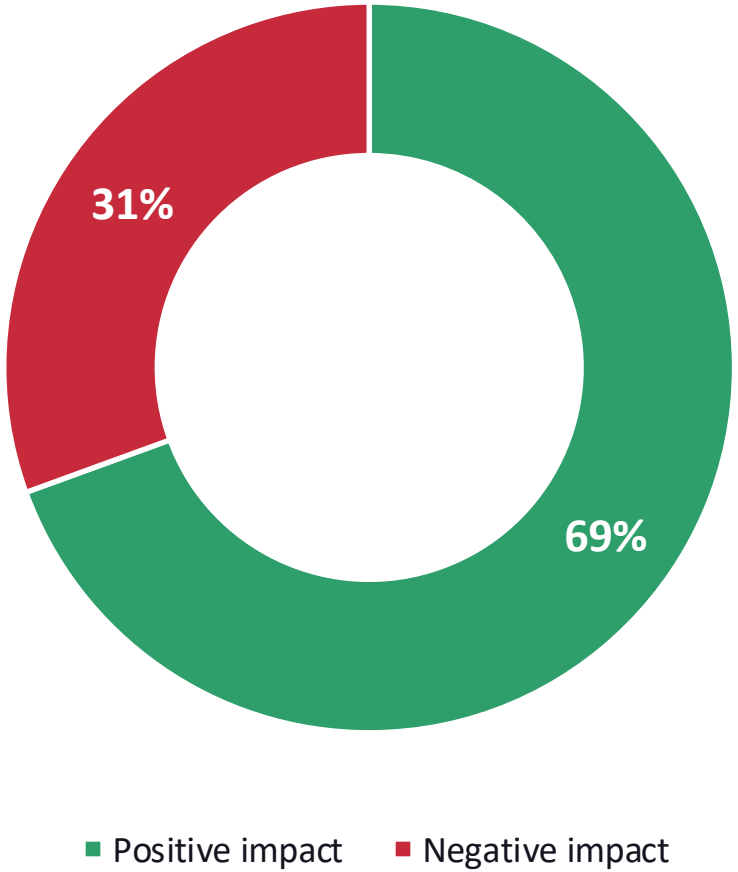

**1 viewer**

logged at Mega Asyut S1, against 153,592 store visits

| Site · screen | Traffic % | Awareness % |
|---|---|---|
| Mega Asyut · S1 | 0.00% | 0.29% |
| Haduq El Zaytoun · S5 | 0.02% | 1.53% |
| Haduq El Zaytoun · S6 | 0.03% | 1.96% |
| Ismailia 2 · S13 | 0.19% | 31.16% |
| Mega Menia · S3 | 0.22% | 3.38% |
| Mega Tagmoa 2 · S9 | 0.27% | 5.34% |
| Demiat1 · S4 | 0.43% | 195.81% |
| Loran · S10 | 0.60% | 95.45% |

The 8 lowest-traffic screens of the 15 reviewed

# 7 in 10 campaigns lift sales

**25 of 36**

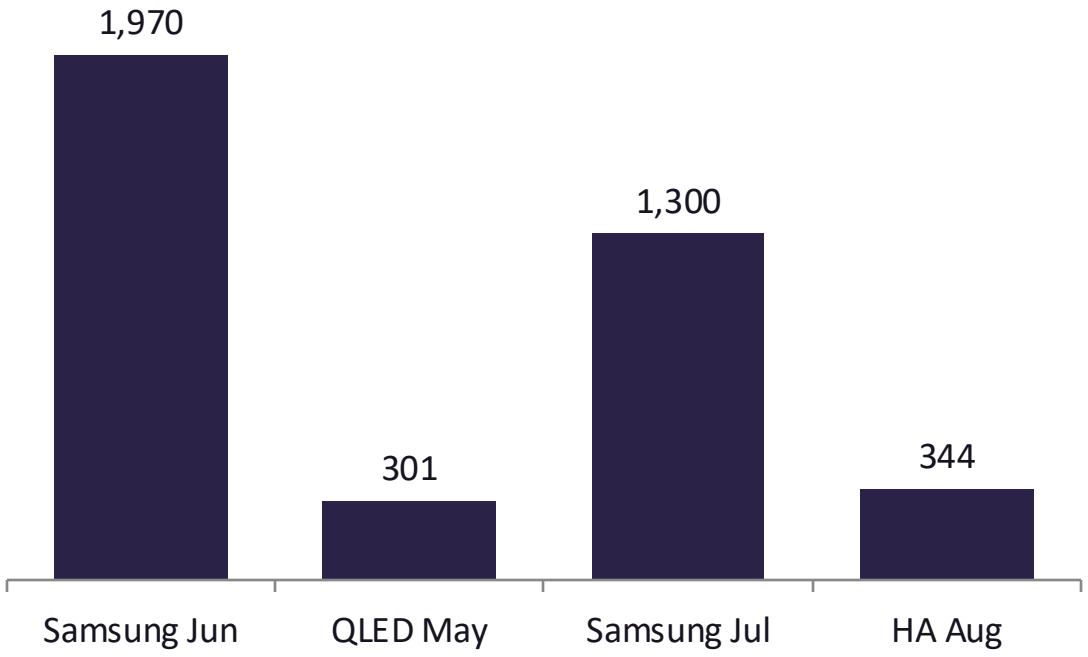

campaigns grew average daily sales vs the prior 6 months

**11**

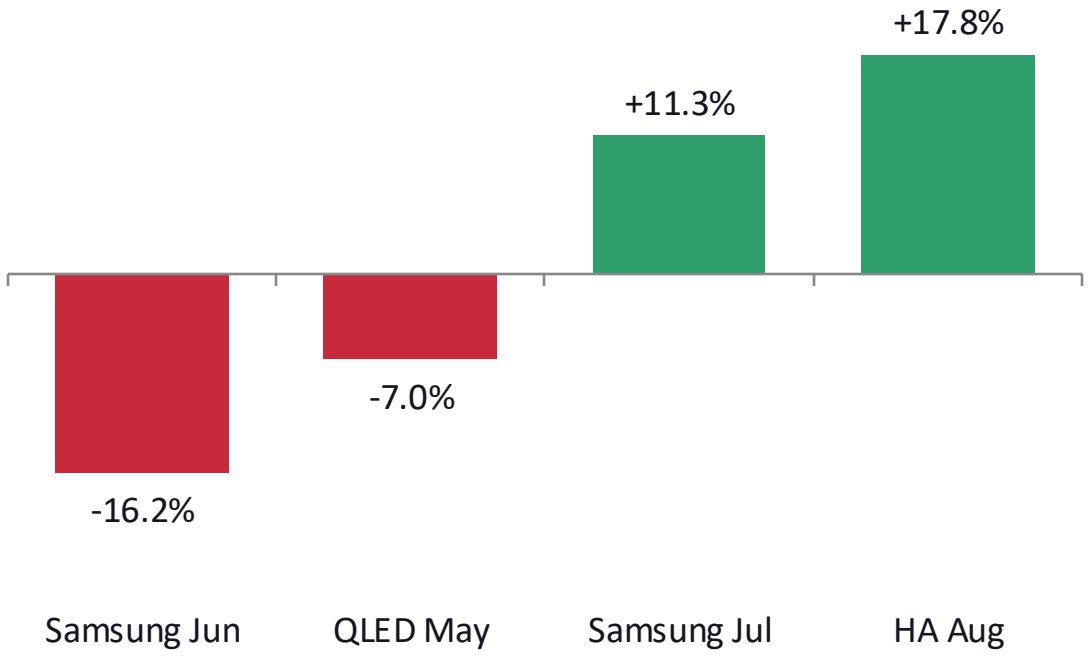

campaigns left sales flat or lower — worth a closer look

# More plays did not mean more sales

## Ad plays (thousands)

## Change in daily sales volume

The biggest campaign (1.97M plays) lost 16% of volume; the 344K-play HA campaign gained 18%. Brand share moved the same way in all four: −2.4%, −3.9%, +2.4%, +2.7%.

# Four fixes to get more from every screen

### Audit the dead screens
Check cameras and angles on screens under 5% traffic or with no viewer data.

### Re-aim low-traffic screens
Move or tilt the 46% of screens below 100% traffic, worst first.

### Trim wasted plays
Shift plays from screens with more plays than viewers (67%) to screens that keep pace.

### Measure the full picture
Verify readings above 100%, and report ROAS and creative score for every campaign.

**Plan campaigns on audience and creative fit — not play volume.**

# Next 30 days: fix, re-aim, re-measure

1

WEEKS 1–2

## Audit & fix

Inspect screens under 5% traffic or without viewer data.

2

WEEK 3

## Re-aim & rebalance

Reposition the worst screens. Shift plays to screens with viewers ≥ plays.

3

WEEK 4

## Re-measure

Re-run traffic, awareness and uplift. Add ROAS and creative score.
