RMN | Q2 Campaigns Performance Analysis

RMN Quantities Uplift

Qtr 2 2024

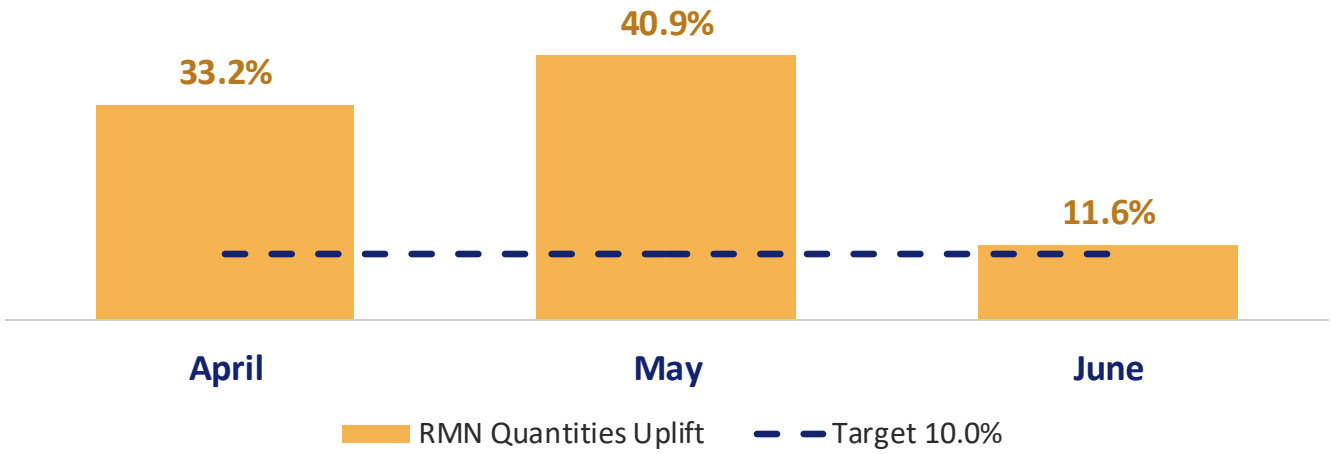

25.3%

Target 10.0%

Quarter overall:

- **18** RMN campaigns
- **12** brands
- Overall **25%** uplift in quantities sold.

Q2 monthly view, the quantities uplift metric met its target:

April: 33% uplift through 6 campaigns

May: 41% uplift through 4 campaigns

June: 12% uplift through 8 campaigns

All is compared to a 10% target uplift agreed as an OKR

***Quantities uplift is compared to the benchmark of 6 months prior to campaign.*

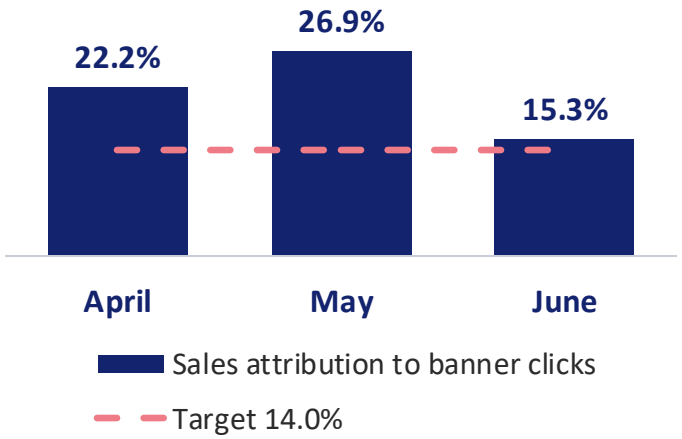

Online | Q2 Campaigns Performance Analysis

Online Sales Attribution to banner clicks

Qtr 2 2024

22.0%

Target 14.0%

Q2 overall: 27 campaigns, 16 brands, overall 22% attribution rate

Q2 monthly view, sales attribution to banner clicks metric met its target on the online channel:

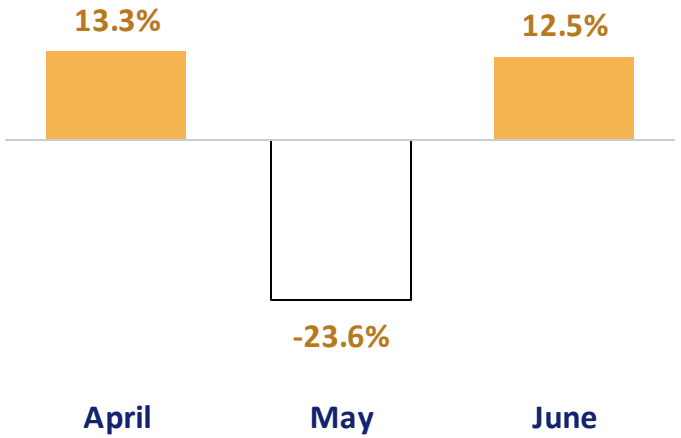

- April at 22% with 5 campaigns,
- May at 27% with 12 campaigns,
- June at 15% with 10 campaigns,

All compared to a 14% attribution target

Online Quantities Uplift

Q2 2024

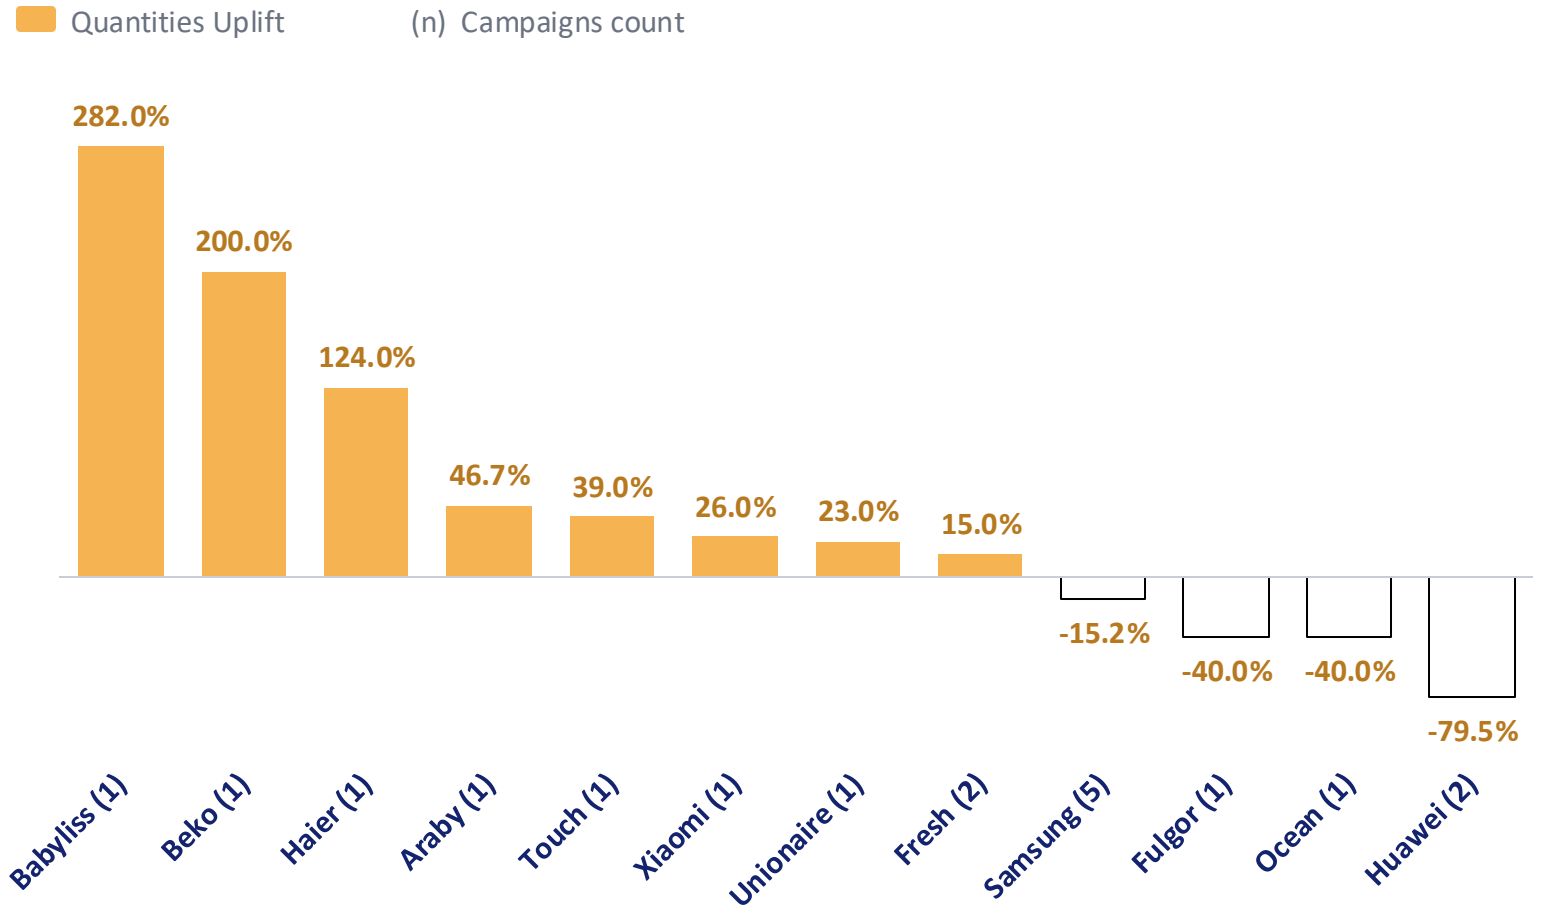

-3.4%

Unlike RMN, Quantities uplift in the online channel dropped by **3.4% in Q2**, driven by a **24% drop in May**, attributed to the overall decline in B.TECH's performance.

RMN Q2 Campaigns Performance | By Brand

RMN Quantities Uplift Per Brand

Babyliss in personal care category achieved a significant **282%** increase in quantities uplift.

In SDAs, **Beko** achieved a 200% uplift.

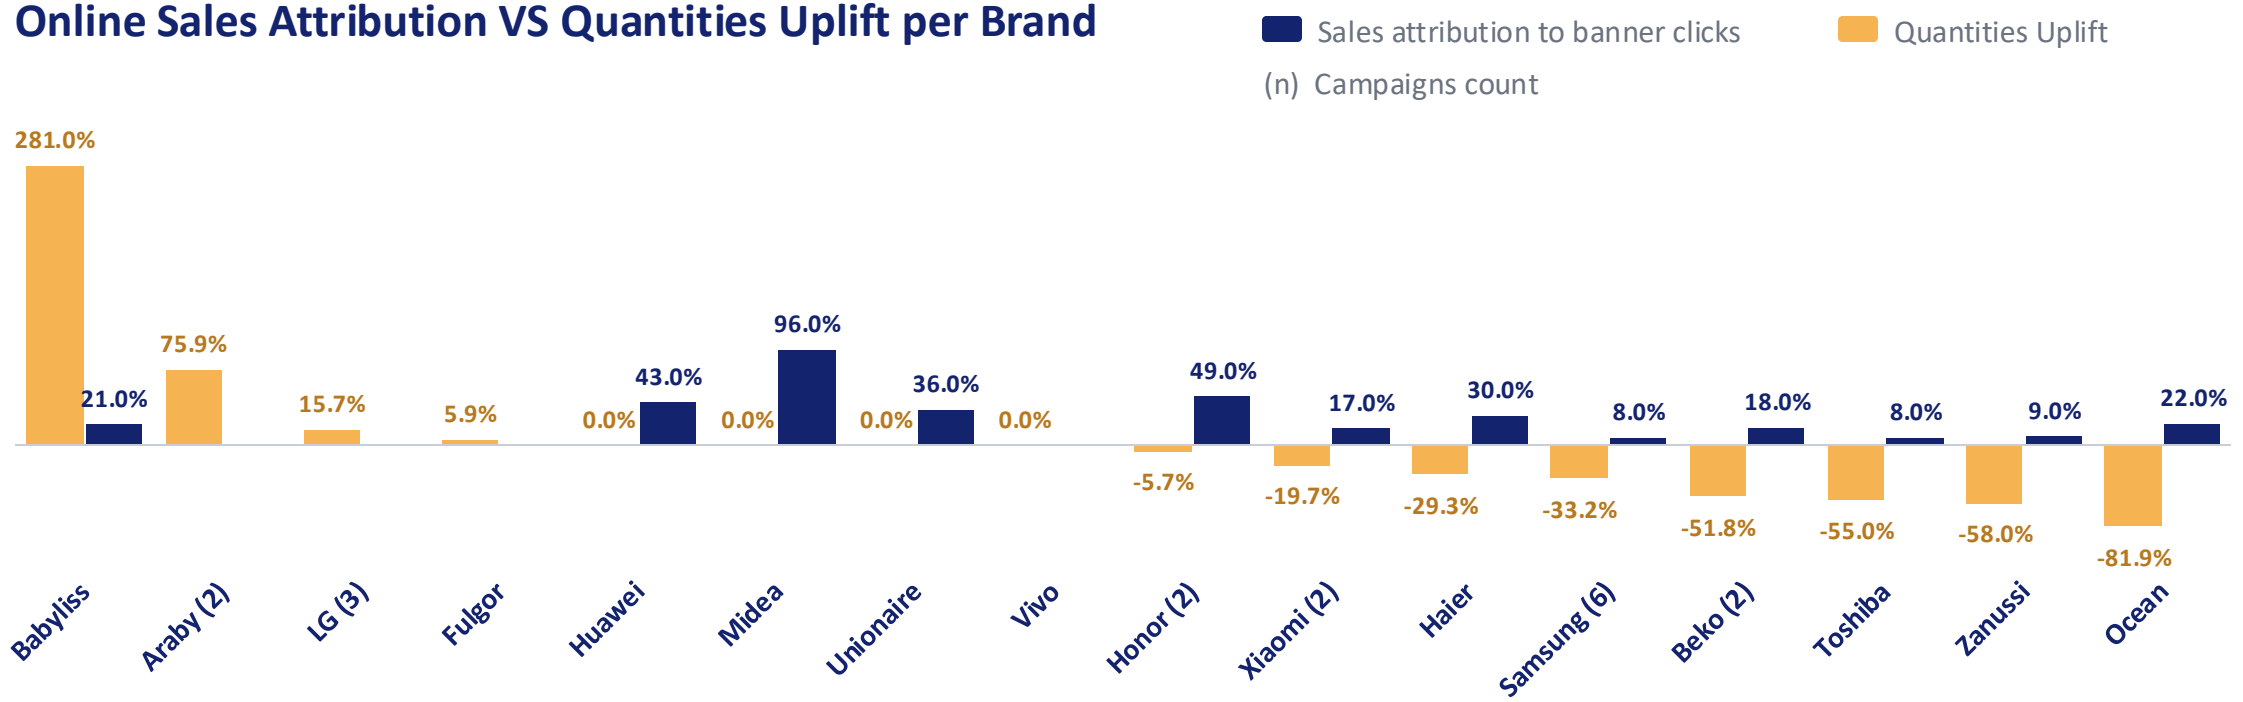

Fulgor, **Ocean** faced a 40% decline, both in MDAs category.

Huawei (watches) experienced decline of 80%.

All three campaigns were conducted in June, which resulted in June's least uplift (11.6%).

Online Q2 Campaigns Performance | By Brand

Online Sales Attribution VS Quantities Uplift per Brand

Babyliss achieved an impressive 280% uplift in quantities

Araby followed with 76% combined across two campaigns

Although **Huawei**, **Midea**, and **Unionaire** did not show any uplift in quantities, there has been a significant sales attribution to banner clicks.

Beko, **Toshiba**, **Zanussi**, and **Ocean** showed the steepest decreases in quantities uplift, all in the MDAs category.

Q2 RMN Campaigns Performance | Insights

Quantities Uplift against 6 Months prior to the campaign

The overall retail environment plays a greater role in determining campaign effectiveness than the campaigns' own characteristics.

SAMSUNG

-15.2%

The **18% drop in Retail quantities sold** across the Home Appliances, Mobiles, and TVs categories during Q2 is the primary driver behind Samsung's **15% decrease** within those same product segments, despite the launch of **5 Samsung campaigns**. The campaigns mitigated the impact but could not reverse the significant overall trend.

BEKO

+200%

By end of 2023, **Beko introduced ~9 new SDA subcategories,** enhancing its product offering, this expansion improved brand performance in SDAs. **The 200% quantities uplift does not solely reflect the campaign's influence**, but also the benefits of Beko's broader product assortment improvements.

Campaigns are more impactful for brands with low share in B.TECH than those with high share.

TOUCH by ZENOUKI GROUP

+39%

BaByliss®

+280%

SAMSUNG

-15.2%

With 1 campaign each, Touch achieved a 39% uplift in quantities and Babyliss saw a remarkable 280% increase, both brands having a low share in B.TECH

In contrast, Samsung, with a high share in B.TECH, faced a 15% average decrease across five campaigns. This suggests that campaigns significantly benefit brands with lower shares in B.TECH.

Q2 Online Campaigns Performance | Insights

Quantities Uplift against 6 Months prior to the campaign

Quantities Uplift against 8 weeks prior to the campaign

Sales Attribution to banner clicks

BEKO	Midea	HUAWEI	unionaire	SAMSUNG	LG
-51.8%	0%	0%	0%	-37%	+16%
-13.3%	+49%	+30%	+20%		
+18%	+96%	+43%	+36%	+8.5%	+19%

Given the **32% decline in overall online sales** during Q2, the fact that these brands were able to maintain a 0% decrease in quantities was a positive outcome, despite the initial perception that the lack of increase signaled poor campaign performance.

The high sales attribution to banner clicks further validated the campaigns' effectiveness and how these banners saved these brands sales

Also, **uplift versus 8 weeks benchmark prior** outperformed the 6-month prior uplift, which included high-seasonality.

The return of LG in TVs category especially with 3 campaigns in Q2 negatively affected Samsung's performance, despite Samsung's 5 TVs campaigns during this period.

Q2 Online+RMN Campaigns Performance | Insights

Quantities Uplift against 6 Months prior to the campaign

Sales Attribution to banner clicks

BaByliss®

Online	+281%	+96%
RMN	+282%	

Babyliss campaigns performed exceptionally well across offline and online channels.

Timing the personal care campaigns to coincide with the Eid period contributed to their success.

HUAWEI

Online	0%	+43%
RMN	-71%	

Huawei's smartwatch campaigns demonstrated strong performance in **online channel contrary to offline**.

Online customers, being tech-savvy, were more inclined to purchase smartwatches through digital platforms.

While offline customers often visit stores with specific purchase intentions, making in-store advertising less effective for smartwatches.

BEKO

Online	-51%	+18%
RMN	+200%	

Beko's offline campaigns in the SDAs category demonstrated strong performance

In contrast, the brand's online campaigns in the MDAs category did not have a positive impact

This can be attributed to the overall decline in the MDAs category online, while Beko's strong offline presence in the SDAs category contributed more to the brand's performance than the campaigns.

Q2 Campaigns | Recommendations

1 Prioritize low-share brands

Touch +39% and Babyliss +280%, while Samsung (high share) fell 15.2% across five campaigns.

RMN

2 Judge online with three lenses

With online sales down 32%, brands at 0% uplift still showed +36% to +96% banner-click attribution.

Online

3 Match channel to category

Huawei smartwatches: +43% attribution online, -71% in store. Beko SDAs: +200% offline, -51% online.

Both

4 Time campaigns to seasonal moments

Babyliss timed with Eid: +281% online and +282% in RMN.

Both

5 Report uplift with market context

Retail quantities fell 18% in Q2 and Beko widened its range, so uplift alone overstates or hides impact.

Both

6 Rework weak in-store categories

Fulgor and Ocean -40%, Huawei -80%, all in June, pulling June RMN uplift down to 11.6%.

RMN

Q2 Campaigns | Action Plan

	ACTION	CHANNEL	KPI TO TRACK
1	**Shift RMN slots and budget toward low-share brands**	RMN	Quantities uplift vs 10% target
2	**Add 8-week benchmark and banner-click attribution to every online report**	Online	Attribution vs 14% target
3	**Set the channel mix by category: online for smartwatches, offline for SDAs**	Both	Uplift by channel and category
4	**Build a seasonal campaign calendar, starting with Eid**	Both	Seasonal vs non-seasonal uplift
5	**Add category sales and assortment changes to every results page**	Both	Uplift vs category trend
6	**Rework in-store MDAs and watch campaigns before the next peak month**	RMN	Monthly RMN uplift vs 10% target

thank you...
